Common Questions and Correct Answers in Everfi's Credit Module

While the specific answers may vary depending on the version of the module, certain themes recur. Here is a detailed breakdown of typical questions and recommended responses.

Q1: What is the best way to improve your credit score?
Correct Answer: Make all payments on time consistently. Keep credit card balances low relative to limits. Avoid opening multiple new accounts at once. Review your credit report regularly for errors.
Explanation: Timely payments are the most impactful factor. Maintaining low credit utilization (preferably below 30%) and avoiding unnecessary new credit inquiries help build and sustain a good credit score.

Q2: How does paying late affect your credit score?
Correct Answer: It can significantly lower your credit score. Late payments remain on your credit report for up to seven years. Consistent late payments can indicate financial irresponsibility to lenders.
Explanation: Payment history is the largest component of your credit score. Even a single late payment can cause a noticeable drop, especially if it's recent or severe.

Q3: What is credit utilization, and why is it important?
Correct Answer: Credit utilization refers to the percentage of your available credit you are using. Keeping it low (below 30%) helps maintain a higher credit score. High utilization suggests high debt levels, which can lower your score.
Explanation: Managing credit

utilization is a simple yet powerful way to influence your credit score positively. Paying down balances and avoiding maxing out credit cards are effective strategies.

Q4: Why should you avoid opening multiple new credit accounts at once?
Correct Answer: Multiple new accounts can lower your average account age, negatively affecting your credit score. Hard inquiries from new applications can temporarily decrease your score. Opening many accounts in a short period may signal financial distress to lenders.
Explanation: Responsible credit management involves opening accounts thoughtfully and gradually, allowing your credit history to age and demonstrating stability.

Q5: How long do negative marks, such as missed payments or bankruptcies, stay on your credit report?
Correct Answer: Missed payments remain for up to seven years. Bankruptcies can stay on your report for up to ten years. The impact lessens over time if positive behaviors are maintained.
