

How much blood does the human body contain?

An average adult human body contains about 1.2 to 1.5 gallons (4.5 to 5.5 liters) of blood, which circulates through the heart and vessels to deliver oxygen and nutrients.

Can the human brain generate enough electricity to power a small light bulb?

Yes, the human brain generates approximately 20 watts of electrical power, which is enough to power a small LED light, showcasing its incredible electrical activity.

What unique feature allows humans to have an interactive experience with their own bodies?

Humans have a highly developed nervous system with sensory receptors that allow real-time interaction with the environment, enabling interactive experiences like feeling textures, temperatures, and pain.

How many muscles does the human body have, and which is the strongest?

The human body has over 600 muscles, and the strongest muscle relative to its size is the masseter (jaw muscle), capable of exerting a force of 200 pounds on the molars.
