Physics Midterm Review Answers

Q1: What is Newton's First Law of Motion?
Answer: Newton's First Law states that an object at rest stays at rest, and an object in motion stays in motion at a constant velocity unless acted upon by an external force. This principle is also known as the law of inertia.

Q2: How is work calculated in physics?
Answer: Work is calculated using the formula: $W = F \times d \times \cos(\theta)$ Where: (W) is work (F) is the force applied (d) is the distance moved by the object (θ) is the angle between force and displacement. If the force is in the same direction as displacement, then: $W = F \times d$
